

## Drone Flight Pattern Chart for Photography

Flight Pattern	Description	Best Use Case	Pro Tip
Hover & Pan	Stationary while rotating (yaw)	Panoramas, wide reveals	Lower yaw speed in settings
Side Slide	Fly left/right with fixed subject	Real estate, tracking shots	Maintain steady altitude
Push In/Out	Fly forward/backward for reveals	Dramatic entries/exits	Tilt gimbal slowly while moving
Orbit	Circle around a subject	360-degree views	Use Point of Interest mode or manual
Top-Down	Camera faces directly downward	Patterns, landscapes	Fly high for better context
Crane Shot	Vertical ascent/descent	Reveals, transitions	Smooth throttle input is key
