

Part 107 Remote Pilot Sample Practice Test

Part 107 Remote Pilot Sample Practice Test (No Answers)

1. What is the maximum altitude above ground level (AGL) that you may fly a small UAS under Part 107?

- A. 500 feet AGL
 - B. 400 feet AGL
 - C. 1,000 feet AGL
-

2. Under what conditions may a remote pilot fly over people?

- A. Never
 - B. Only with a waiver
 - C. Only if the drone meets FAA-approved Category 1, 2, or 3 operations
-

3. How often must you complete recurrent training or testing to maintain your Remote Pilot Certificate?

- A. Every 12 months
 - B. Every 24 months
 - C. Every 36 months
-

4. What is required to operate in Class C airspace?

- A. No permission required
 - B. Prior ATC authorization
 - C. Visual line of sight only
-

5. What is the minimum visibility requirement for sUAS operations?

- A. 1 mile
 - B. 3 miles
 - C. 5 miles
-

6. When is it legal to fly a drone from a moving vehicle?

- A. Only in rural areas and not over people
 - B. Anytime
 - C. Never
-

7. What is the purpose of an FAA Sectional Chart?

- A. To display drone routes
 - B. To provide detailed aviation maps including airspace and airports
 - C. To track drone registration
-

8. You must report an accident to the FAA within how many days if it results in serious injury or property damage over \$500?

- A. 10 days
 - B. 30 days
 - C. Immediately
-

9. What class of airspace typically surrounds large, busy airports and requires prior ATC clearance?

- A. Class D
 - B. Class E
 - C. Class B
-

10. What is the definition of "night" according to Part 107 rules?

- A. 1 hour before and after sunset
 - B. The time between the end of evening civil twilight and the beginning of morning civil twilight
 - C. After sunset until sunrise
-

11. What does "LAANC" stand for?

- A. Low Altitude Authorization and Notification Capability
- B. Local Aircraft Navigation Control

- C. Licensed Airspace and Navigation Coordination
-

12. What is the effect of high density altitude on drone performance?

- A. Improved performance
 - B. No effect
 - C. Reduced performance
-

13. What does METAR stand for?

- A. Meteorological Aviation Report
 - B. Meteor and Rainfall
 - C. Measured Earth and Air Report
-

14. If your drone loses connection during flight, what should it do?

- A. Land immediately
 - B. Hover and await command
 - C. Return to home (if programmed to do so)
-

15. What is the weight limit of a small UAS under Part 107 rules?

- A. 25 lbs
 - B. 55 lbs
 - C. 50 lbs
-
